DETAILED ACTION

Response to Amendment

1. The proposed amendments to the claims change the overall scope of the claims. Thus, the proposed amendments to the claims require further consideration and further search.

Additionally, the proposed amendments to the claims attempt to add claims without cancelling a corresponding number of claims. Thus, the proposed amendments to the claims will not be entered.

Response to Arguments

2. Applicant's arguments filed 29 December 2005 have been fully considered but they are not persuasive. Applicant's arguments allege that the prior art cites in the previous office action, dated 23 August 2005 and mailed 13 September 2005, do not teach the presently proposed amendments to the claims. However, as discussed above, the proposed amendments to the claims have not been entered. Furthermore, the proposed amendments to the claims will require further consideration to determine whether or not the previously cited prior art anticipates the proposed claims and/or renders the proposed claims obvious to one of ordinary skill in the art at the time of the invention and a further search will be required in order to determine if additional prior art anticipates the proposed claims and/or renders the proposed claims obvious to one of ordinary skill in the art at the time of ordinary skill in the art at the time of the invention.
